GPU Scratchpad Memory — Naming Across OpenCL / CUDA / This Paper
The contract's "Local" follows the OpenCL/LeftoverLocals sense (the scratchpad); CUDA "local" denotes the unrelated global-backed spill region.

OpenCL term	CUDA term	Physical location	This paper	In scope?
local	shared	on-chip SRAM (per-SM)	scratchpad	✓ **yes (P-reuse)**
private (spill)	local	off-chip global DRAM	spill "local"	✓ **yes (P-spill)**
global (staging)	global	off-chip global DRAM	staging buffer	✓ **yes (P-stage)**
global (output)	global	off-chip global DRAM	committed output	**– no**
